Pinta

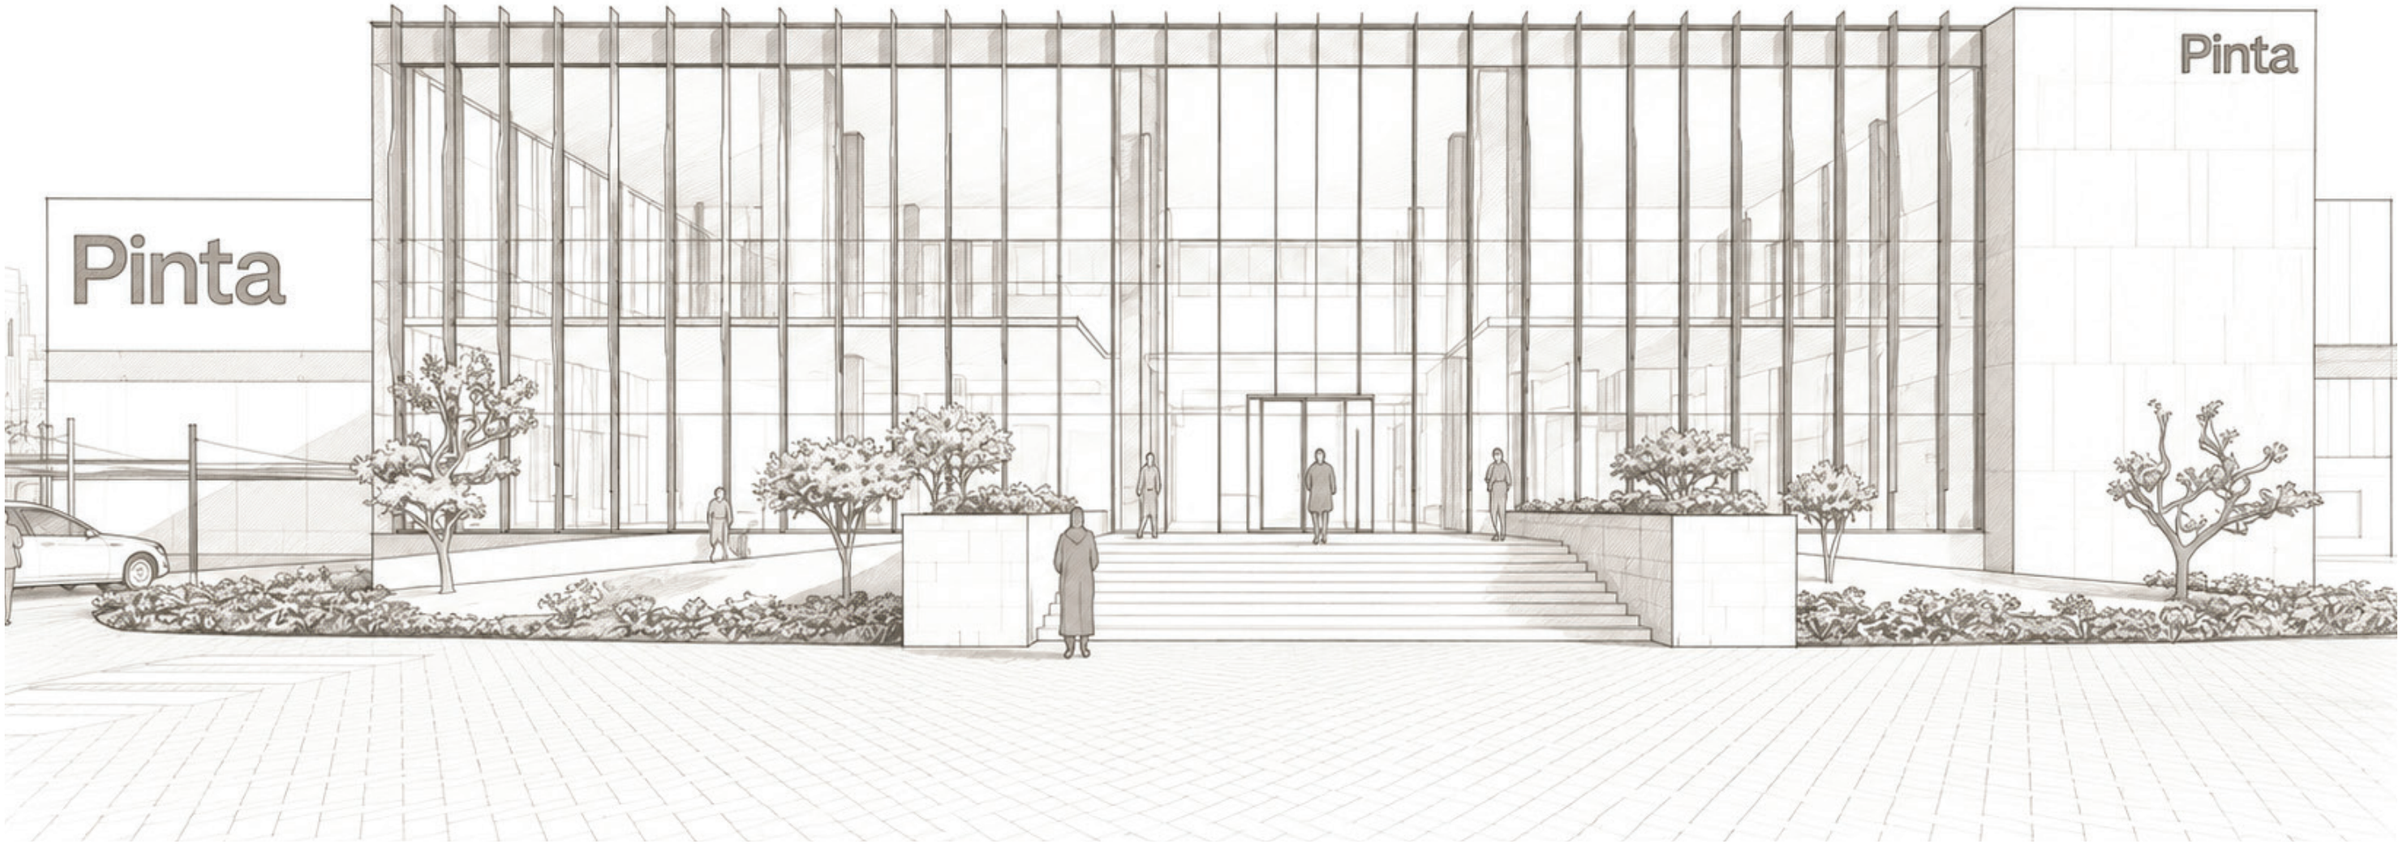

DESIGN THAT WORKS FOR MAKERS

At Pinta, we believe great design begins with the people who bring it to life the makers.

Our vision is to empower the architects, designers, and craftsmen who shape the spaces we live and work in. Every material we create is built to support their ideas, simplify their process, and elevate their outcomes.

We see design not as decoration, but as purpose a bridge between imagination and execution.

That’s why Pinta stands for reliable quality, timeless aesthetics, and practical innovation materials engineered to perform beautifully in real world applications.

ABOUT US

PINTA is a UAE-based brand creating design-led surface solutions for modern interiors, where advanced engineering meets refined material thinking. Proudly **Made in UAE**, PINTA operates from a **50,000 sqm** facility in Dubai's **National Industries Park**, combining innovative décor development, advanced textures, and high-quality production to create panels with sophistication, consistency, and performance. With a strong focus on design, reliable supply, and manufacturing excellence, we aim to become a trusted and preferred name for premium panel solutions.

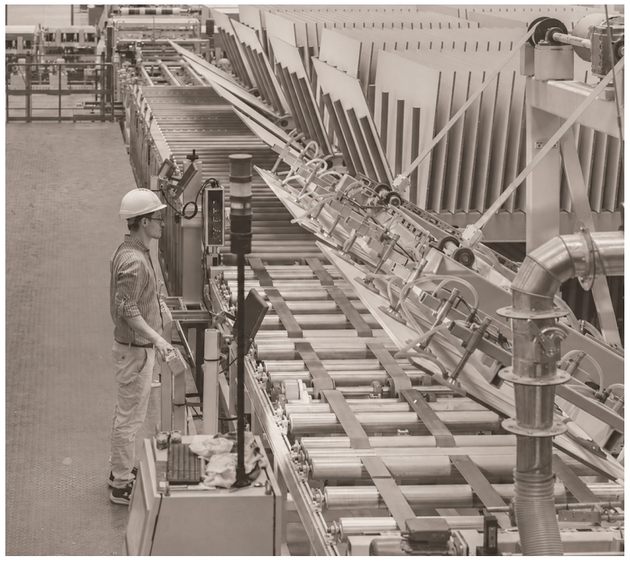

OUR DÉCOR LANGUAGE

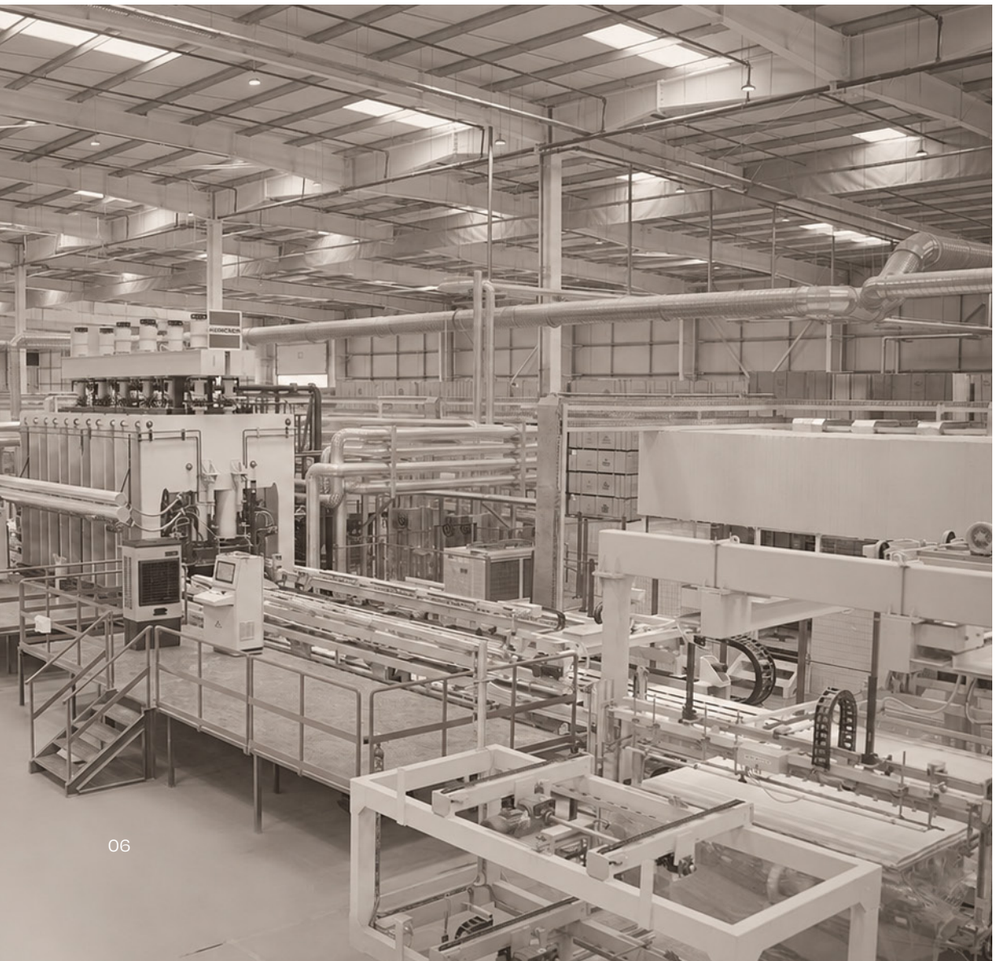

At Pinta, décor is more than a visual element it is a design statement. Every décor is developed with a clear sense of purpose, balancing originality, versatility, and timeless appeal. Rather than following conventional market patterns, we focus on creating surfaces with their own identity, allowing designers and manufacturers to achieve distinctive results.

Our collections are shaped through the careful interplay of colour , pattern, and texture. From contemporary woodgrains and sophisticated solids to fabric inspired finishes and tactile textures, each décor is designed to create depth, character, and visual harmony.

OUR PRODUCTION STRENGTH

CAPACITY THAT DELIVERS

With a high capacity manufacturing base in the UAE, Pinta
is built to support projects of every scale from bespoke interior applications to large volume commercial requirements. Our advanced production setup enables the efficient manufacturing of a wide range of panel sizes, thicknesses, and specifications while maintaining consistency across every batch.

WHAT SETS US APART

Design that Leads
Original concepts and a distinct visual identity that move beyond market defaults - décor developed with its own identity, offering versatile variations and a distinct style.

Texture in Focus
A wide and curated range of textures, each thoughtfully paired with our décors so that depth, feel, and finish work in concert rather than as afterthoughts.

Made in the UAE
A high-capacity local facility means faster turnaround, better quality control, and the flexibility to deliver multiple sizes and thicknesses on the timelines real projects demand.

Engineered Performance
E1 grade as standard, with MR and HMR options on request - controlled formaldehyde levels and reliable behaviour in real-world conditions.

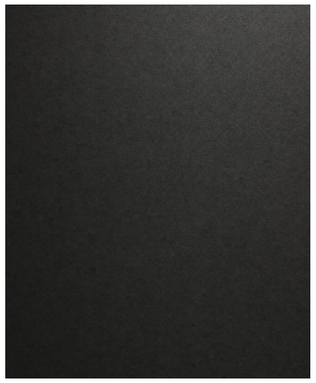

Service You Can Rely On
Clear communication, responsive coordination, and dependable support from enquiry to delivery - because the material is only as good as the experience around it.

Brand Value
Our focus is on establishing Pinta as a well-recognized and preferred brand for panel solutions. Through consistent quality, strong design direction, and reliable supply, we aim to become a trusted name that customers actively seek for their projects.

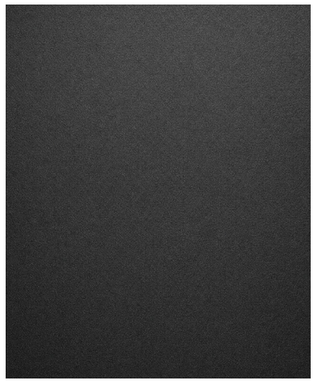

From the soft rhythm of Fabric to the natural depth of Wood Grain, Pinta's texture collection brings every surface to life through touch. Each texture Fabric, Leather, Pearl, Stripe, Supermatt, Wood Grain, and Freeze adds its own character, transforming décor

SOLID DECORS

Developed in our supermatt texture, each shade in the Solids range offers a smooth, ultra-low reflective surface that lets colour speak with absolute clarity. The palette is carefully curated to suit a wide range of interior styles, from soft neutrals to deeper architectural tones.

Each shade is carefully balanced for warmth, pairing effortlessly with wood grains and richer décors. Designed to maintain its character across lighting conditions, this range creates cohesive interiors, offering subtle gradients, refined contrast, and a dependable

Earthy tones - taupes, sands, clays and terracottas, bring the warmth of natural pigment to the supermatt finish. These shades are designed to ground a scheme, to act as a quiet counterpoint to wood grains and stone, and to add depth to hospitality and residential interiors without ever leaning rustic or thematic. In context, they read as confidence rather than colour: the kind of tonal warmth that makes a room feel resolved rather than decorated. Specified often in boutique hospitality, considered residential schemes, and retail environments that prize atmosphere over impact.

SOLID
DECORS

These are the shades behind many of the most photographed bar fronts, boutique retail interiors, and feature wardrobes of recent years. Used in spaces where the room needs to settle into itself, and where a single surface should do the work of an entire mood.

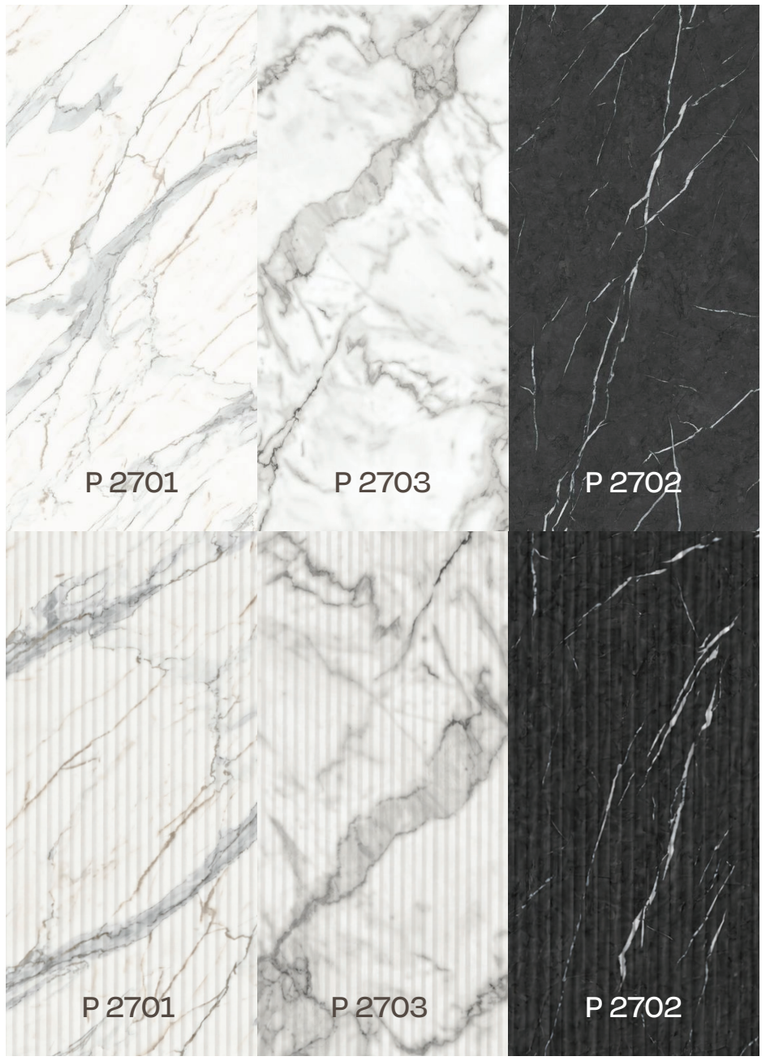

LEATHER DECORS

The smooth matte finish and soft tactile quality work especially well with deeper tones and bolder décors, adding warmth, premium character, and the kind of textural depth that lifts a fit-out into a different register entirely.

MARBLE
DECORS

The Pearl collection is defined by its fine, uniform grain - a consistent and durable surface character that adds depth while maintaining a clean, modern appearance. With a soft matte sheen, these décors enhance solid colours and contemporary palettes, offering a refined finish that is both practical and visually balanced.

FABRIC
DECORS

Each décor is designed to add warmth without overwhelming the space. Developed with a matte finish, these surfaces offer a balanced tactile feel and a calm, consistent appearance - ideal for applications that seek a quiet, sophisticated texture with a contemporary edge.

With a balanced matte finish and a natural tactile feel, the collection is designed to suit both classic and contemporary interiors, offering warmth, familiarity, and refined visual texture without ever drifting into pastiche.

The Stripe texture reads almost as a tonal wash, a gentle directional signal that the eye picks up at close range without being shouted at from across a room. The lines hold structure without imposing a pattern, ideal for spaces that need architectural rhythm.

The linear texture introduces a sense of order and considered detail to large surfaces, helping reception walls, lift lobbies, corridor casework, and meeting room frontages feel resolved. These are décors that quietly elevate everyday architecture - the surfaces in the parts of a project that are seen many times each day, and that benefit from a finish that rewards repeated viewing.

With a smooth matte finish, this collection delivers warmth with a more controlled and contemporary expression, sitting comfortably in modern residential, hospitality, and workplace interiors where consistency and calm are part of the design intent.

WOOD DECORS

In pale tones, the Freze grain almost dissolves into a soft, organic surface. These décors are specified often by designers who want the suggestion of wood without the commitment of strong grain: the warmth, without the weight.

Ideal for kitchens, dressing rooms, minimalist residential interiors, wellness spaces, and the kind of contemporary projects that prize quiet over expression. Particularly successful when used as a full-height surface, where the consistency of the soft grain reads almost as a textile.

Specified often for full-height wardrobe walls, large kitchen schemes, hotel suites, and any project where joinery needs to be read as resolved rather than as a series of decorative gestures. A surface that disappears into the architecture, in the best way.
